Skills

- Built a home services platform that connects homeowners with trusted service providers during my Product Design training. Conducted user research, created wireframes and prototypes, and designed user-friendly workflows to improve service booking and communication.
- Built a responsive portfolio website during my Software Development training to showcase projects, skills, and professional experience. Focused on accessibility, responsive design, and creating clean, user-friendly interfaces.

Tech Stack

JavaScript, TypeScript, HTML5, CSS3, Node.js, React, Git, GitHub, Scratch programming, Vite, Styled Components
